As the former CFO of several high-growth companies, Dave offers skilled operational and financial leadership to clients during periods of transition and rapid growth. With experience leading companies through growth, acquisitions, and divestitures, Dave has negotiated and executed dozens of loan agreements and equity issuances, implemented processes, systems, and controls to support growth, and become a trusted advisor to CEOs and company board members. He has served in executive roles including CFO for a fast growing hourly staffing company, a healthcare technology firm, and a marketing and professional communications company.

Dave believes the role of CFO goes beyond taking care of company finances. He knows it is critical to be a key partner to the CEO in setting company strategy, arming business leaders, boards, and investors with the financial data they need for effective decision-making, and assuring that operational platforms and processes support the enterprise's growth objectives. Dave was named 2008 CFO of the Year for Best Small Private Company by Virginia Business Magazine.
