[VCARD](#) | [LINKEDIN](#)

With a depth of experiences across the Manufacturing and Logistics industries, Greg brings deep experience in accounting, financial reporting, month-end close, cost accounting, budgeting, process improvements, and key controls for both private and publicly-held companies. Greg works with clients to improve the efficiency of their accounting operations, data integrity and timeliness of reporting which, in turn, allows for better decision making and improved cashflows to an organization.

Greg has worked for large, publicly held companies, as well as smaller, privately held businesses. Most recently, Greg was the Plant Controller and Operations Controller for a manufacturer of building materials, and also led the Finance team of the company's European subsidiary. Greg was also Controller of a store fixture manufacturer and supplier for the retail industry, and Plant Controller for an auto parts manufacturer. Greg developed strict financial reporting cadences which allowed for better visibility for the company's executive management.
