Chris Markwith is a successful finance and operations professional with 25+ years in progressive leadership roles. With his broad range of expertise in accounting, financial reporting, operations, human resources, process improvement, and information technology, Chris helps clients manage through change. He advises on the status and functionality of accounting operations, streamlines processes, recommends and implements new processes or software to increase efficiency.

Chris began his career as an auditor before transitioning to a career leading to Controller and CFO roles primarily focused on healthcare and non-profits. Chris has worked with organizations with \$12 million in revenue to \$230 million in revenue, and organizations with assets under management of over \$565 million. He has a successful track record of building teams and driving efficiency and change. He has extensive experience in financial reporting to regulatory entities and boards of directors. Having sat on several boards, he has a keen understanding of their reporting needs.
