[VCARD](#) | [LINKEDIN](#)

With a career spanning auditing, corporate finance, investment oversight, and full-cycle accounting leadership, Kan brings nearly two decades of financial expertise to every organization served. Known for building resilient accounting solutions, strengthening internal reporting, and delivering clear, data-driven insights, Kan has held key roles across multiple industries, including government, insurance, biotechnology, housing finance, and technology.

Kan began his career in auditing and compliance, and then transitioned to asset management, helping build robust financial models to maximize business value. He later helped create operational processes and tools to manage the growth of a technology startup. His financial background enabled him to create budget and forecasting solutions for various nonprofit, governmental, and for-profit entities. His accounting background allowed him to manage the operational accounting needs for organizations and to develop process improvements.
